

Application and construction

Capacitors are intended for the improvement of Power Factor in low voltage power networks. Used MKP technology which consists of metallized PP film with extremely low loss factor. The dielectric system is self-healing and has no liquid impregnant.

Capacitor elements enclosed in cylindrical aluminium cases are filled with a vegetable oil based gel which is non-toxic, biodegradable and environmentally friendly.

The capacitors have overpressure protection to disconnect it from the supply in the event of internal failure and at the end of its operational life.

The construction described above and the use of high quality materials ensure reliability and longevity.

Installation instructions

Capacitors can be installed in any position. Mounting is by M10 stud on the base and this can also be used for the earth connection. Maximum tightening torque is 5 Nm. Connections are 5 mm screws, max torque 2 Nm. Connecting cables must permit the capacitor top to rise by 20 mm to ensure correct operation of the overpressure disconnecter.

Back up fuses should have gG characteristics and they should be rated at twice the nominal current of the capacitor(s).

Attention ! It is necessary to connect the capacitors only by Cu wires

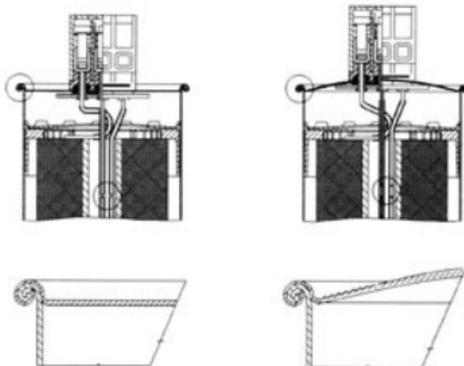

For power 25 a 30 kvar to the terminal by torque of 2,5 Nm

It is possible to delivery all types of capacitors in Al case diameter 85 and 110 mm with plastic cover for protection IP 54 (see drawing 2ab on page 4) !

Plastic covers for capacitors in cylindrical Al case

For capacitor of diameter (mm)	Degree of protection	Outlet	Dimensions (mm)	Weight (kg)	Drawing No.
∅ 85	IP 54	PG 16 - 21	∅ 93	0,0363	2a
∅ 110	IP 54	PG 16 - 21	∅ 118	0,0463	2b
∅ 146	-	-	-	-	-

Function of disconnecter

Technical data

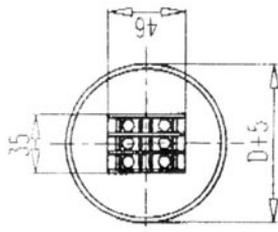

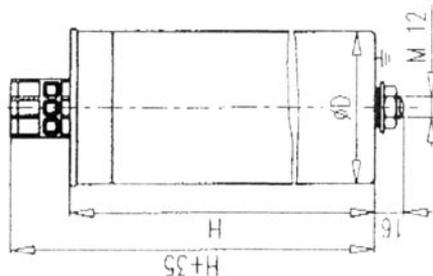

Rated voltage:	400, 415, 440, 480, 525, 580, 690 V						
Frequency:	50/60 Hz						
Standards:	IEC 60831-1: 1996	EN 60831-1: 1996	VDE 0560-46: 3/95				
	IEC 60831-2: 1996	EN 60831-2: 1996	VDE 0560-46: 3/95				
Max overvoltage:	$U_N + 10\%$ (up to 8 hours daily) $U_N + 15\%$ (up to 30 minutes daily) $U_N + 20\%$ (up to 5 minutes) $U_N + 30\%$ (up to 1 minutes)						
Overcurrent (according to above standards):	$1,5 \cdot I_N$						
Capacitance tolerance:	-5 / +10%						
Test voltage, terminal/terminal:	$2,15 \cdot U_N, AC, 2 s$						
Test voltage, terminal / case:	$U_N \leq 660 V : 3000 V AC, 10 s$ $U_N > 660 V : 6000 V AC, 10 s$						
Inrush current:	max. $200 \cdot I_N$						
Dielectric losses:	cca $0,25 W / kvar$ (without discharge resistors)						
Capacitor losses:	cca $0,5 W / kvar$ (with discharge resistors)						
Statistical life expectancy:	cca 100 000 hours						
Degree of protection:	IP 20, on request IP 54, indoor mounting						
Ambient temperature category:	-25 / C						
	symbol	maximum	highest mean over any period of:				
	C	50°C	<table border="1"> <tr> <td>24 h</td> <td>1 year</td> </tr> <tr> <td>40°C</td> <td>30°C</td> </tr> </table>	24 h	1 year	40°C	30°C
24 h	1 year						
40°C	30°C						
Cooling:	naturally air cooled						
Permissible relative humidity:	IP 20 – maximum 95 % IP 54 – maximum 95 %						
Max above sea level:	2 000 m above sea level						
Mounting position:	any position possible						
Mounting:	threaded M12 stud at the bottom of the case (max. twisting moment 5 Nm)						
Safety features:	overpressure tear-off fuse						
Case:	cylindrical, Aluminium can						
Dielectric:	MKP - metallized polypropylene film, self healing						
Impregnant:	soft resin, non PCB						
Terminals:	Double, tree-way (connected to terminal with bolt M5 by max twisting moment of 2,5 Nm)						
Discharge resistors:	Included - 1minute, 50 V (by type CSADP1-0,4/30 3 minute, 75 V)						

Three-phase capacitors: 440 V, 50 Hz, IP 20, MKP - dry

Type	Power	Current	Capacitance	Dimensions	Weight	Drawing
